

The HowsYourHealth Registry

Your Patients Do the Entry: Together You Do the Management

Why?

Needed is a non-labor intensive, behaviorally sophisticated registry to improve condition management and patient self-management. The data included is intended not to be exhaustive; rather, the data is intended to be actionable. Over time, in response to testing and evaluation, data may be added or deleted.*

Work needed?

- Set up in HowsYourHealth customization/administrative section and email address for your patients to send you their results.
- Sign the Business Associates Agreement with Venix to store the information in a HIPPA secure server.
- Get your patients to complete HowsYourHealth and agree (on line) to send you their information.

How to use it?

Merely enter the registry using your code and password. Sort patient list using combinations of age, gender, and their responses. You may print or download and Excel spread sheet of the names and addresses as they appear in the patient list.

*[We will soon add the data element **“Completed Personal Health Record”** because those patients would have in their possession their medications, allergies, advance care plan, and many other key patient responses from HowsYour Health not included in the Registry.]

* [For patients aged 70+ we would also add **“Fair/Poor Overall Health”** as a trigger for referral to the “Frail” HowsYourHealth website.]
