Flow Sheet shows information over time for 1 patient...

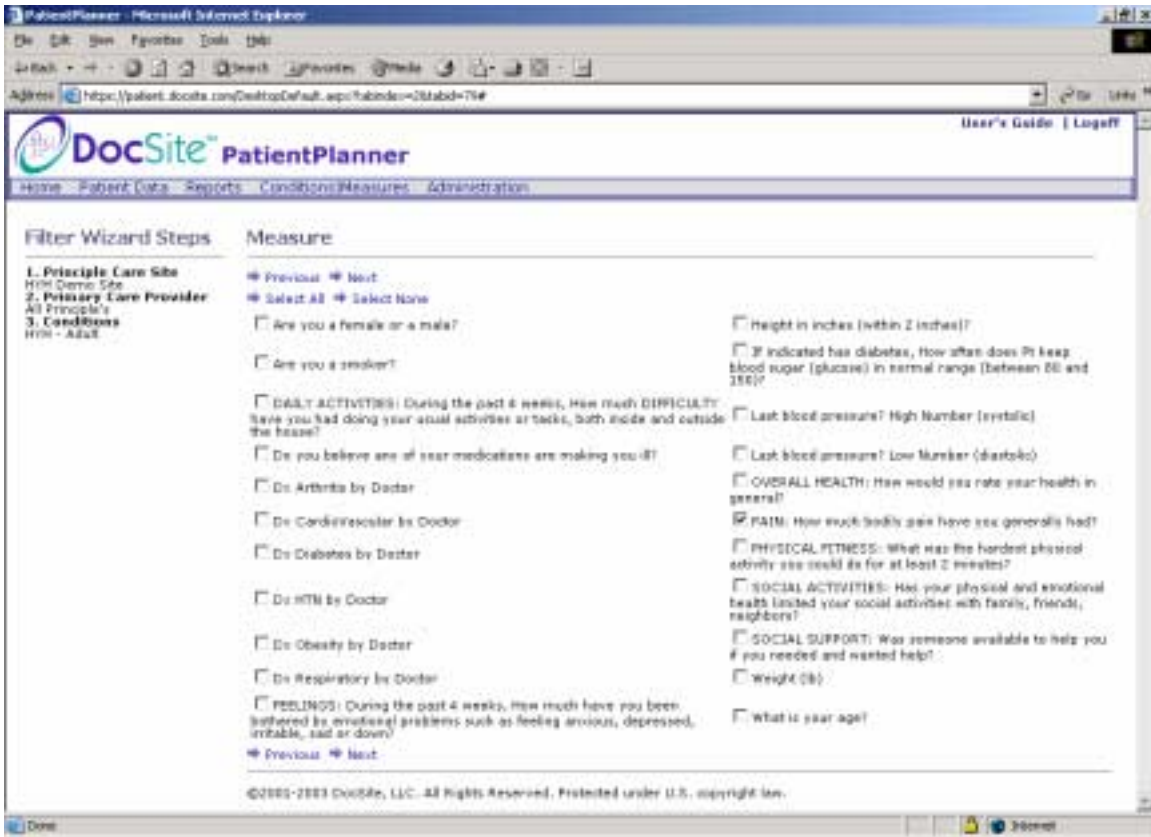

GROUP REPORTS

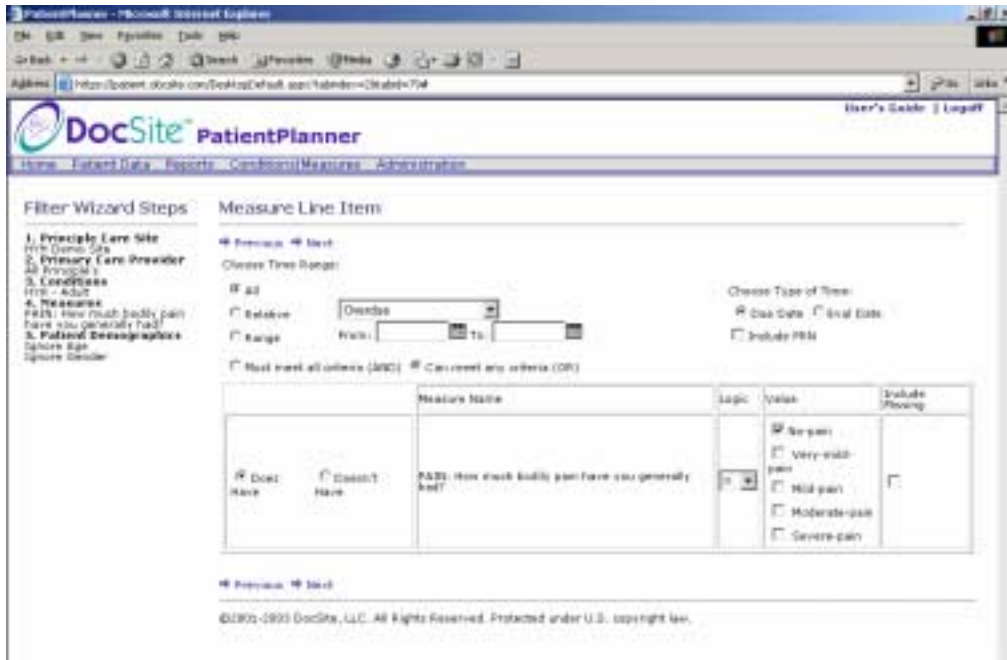

To make a report for a Group of Patients (for outreach or provider summary) or to show a full Patient Summary -- Use the Population report Wizard

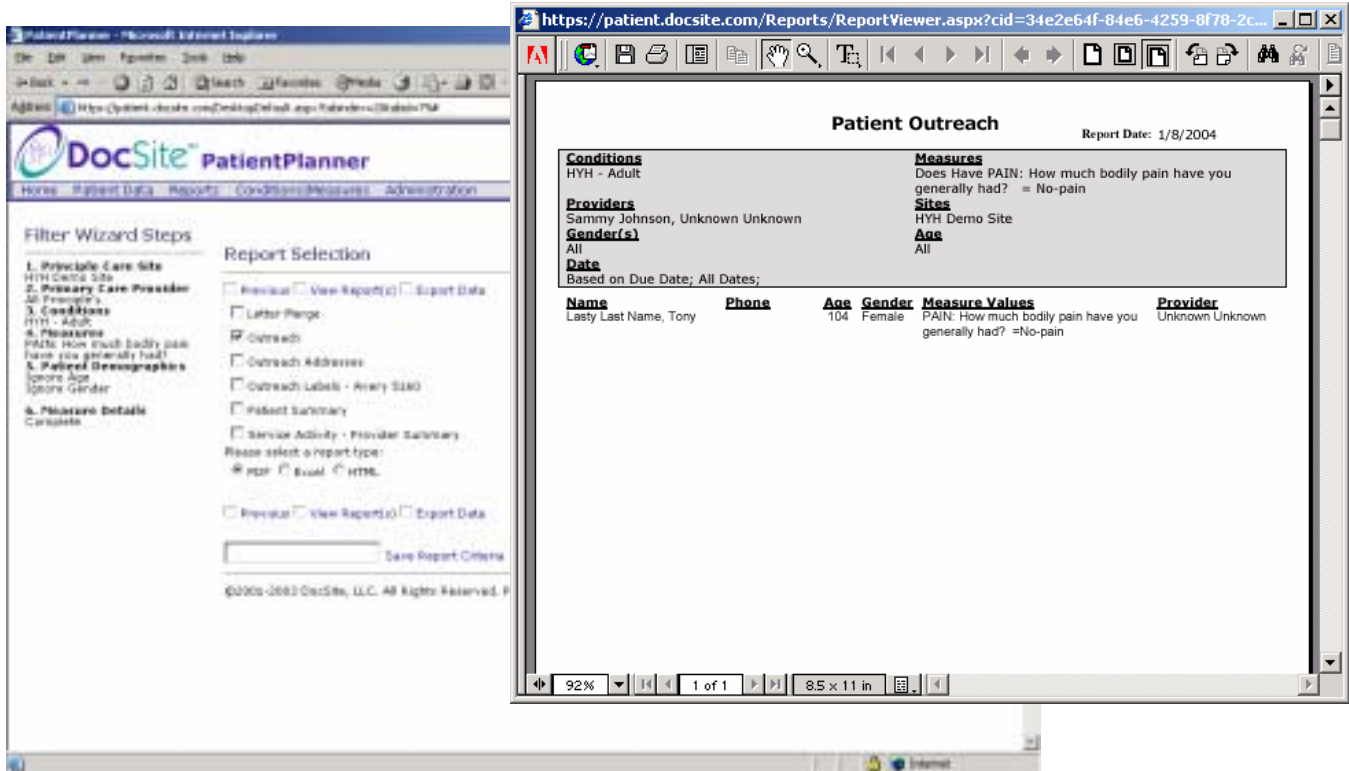

Step through the wizard, checking off choices – Here, HYH demo site was chosen in the first screen, all providers in the second, HYH adult survey in the 3rd, and Pain in this the fourth screen.

Click through demographic choices then, choose limits or filters for the measure(s) of interest, in this case, “no-pain” as an answer to the question

One patient has “no-pain” recorded in the answers...

If the filter is reset to any answer (all checked)... Then, obviously, more patients show
